

To whom this may concern,

I would like you to put an end to this madness! All said and done, how much money did they spend sending absentee ballots for 2020? How many signatures were verified? How many people received multiple ballots? How many ballots were sent back, proving that their list was wrong! How many duplicates did we have? Why were ballots sent to prisoners in jail? Why are dead people voting? I think we all know the answer to these questions but it would be nice to see the ACTUAL numbers! We should have the right to request this! Anyone who votes in favor of this clearly supports fraud. Absentee ballots are meant for those in service, those gravely ill etc. You cannot continue to stretch definitions so that every person can mail in vote for any excuse in the book! Our President, the CDC and many Governors across the country have proclaimed covid to be pretty much over! There is absolutely no reason why people should not be voting IN PERSON, with some proof of identification, and measures in place. We need election integrity and that should be something that ALL parties agree with, unless of course you know that this fraud which tends to push things your way! They sold our kids out, they destroyed many of them, they destroyed businesses, mental health, livelihoods, and stripped away parental rights and choice all in the name of "covid" and this had been made very clear! Many in our state have been voting against its people and MANY of us are aware. The least you can do is secure our elections, in person, and fraud proof! Most people are back to work, school, social gatherings...there is absolutely no reason they cant make it to vote. If they care that much to vote, they will show up! Do not meddle with our Constitution and warp it to suit your ways.

Thank you
